

EXAM ANALYSIS

COURSE TITLE:	DATE:
---------------	-------

Step One: Identify five questions you got right.

Q#	Topic	How did you study for this topic or problem type?	Why did you get this question right?	What can you learn from it?

How will you use this information as you prepare for your next exam?

--

Step 2: Now, identify some questions you got wrong.

Q#	Topic	Content Errors				Application	Test Taking/Mechanics		
		Never Saw	Decided not to study	Studied but learned incorrectly	Studied but could not recall	Studied & recalled basic info but could not apply it	Misread or Misinterpreted	Impulsive/Overconfident	Fatigue or Pacing

What can you learn from the questions you answered incorrectly? How will you use this information to adjust your studying for next time?
